

## Equal Opportunities Workshop: Visible and Well Connected: Networking Strategies for Female Scientists?

### Why does it matter?

In preparation of the forthcoming symposium, "Women in Science", female ECRs can equip themselves with tailored strategies to make the most of networking opportunities.

### Content and impact

- The art of academic networking: which networks truly matter and how to strategically build and nurture professional connections
- Innovative approaches for effective networking at conferences and meetings
- How to use digital platforms, including social media and research networks, to maintain and expand your professional circle
- Strategies that amplify your presence in research, teaching, and academic networks

We will address the unique challenges faced by women in science, but more importantly, we will uncover the possibilities to increase your impact and recognition in the field. Throughout the workshop, you'll gain hands-on experience, share insights with peers, and acquire practical skills that you can immediately apply to your career. This interactive workshop is designed not just to impart knowledge, but to build a supportive community where experiences and ideas can be freely exchanged. Join to unlock your networking potential and elevate your presence in the scientific community!
